## MAINTENANCE & CARE

All furniture will need some maintenance and care to keep it in tip top shape. If you aren't in a position to look after your furniture or don't care to do so, consider purchasing veneer based bedroom furniture. It is usually easy to care for and doesn't scratch so easily. At Meubles we stock some veneer based bedroom furniture. Or some of our suppliers offer glass top covers to protect the surface area.

We however love the beauty of natural wood and painted finishes and offer a wide selection of bedroom furniture that is made out of these materials. They do need some extra care and attention but cared for regularly will provide years of great satisfaction.

## HERE'S OUR MAIN MAINTENANCE & CARE ADVICE TIPS:

1. Most manufacturers provide maintenance and care advice for the items they produce. Ensure to read their care advice and follow it. Failure to do so can make the manufacturer's guarantee invalid.
2. To maintain the appearance of your furniture we recommend regular dusting with a soft cloth.
3. Some of our natural oak ranges will need oiling over time. Ensure to oil this furniture as recommended by the manufacturer.
4. Harsh detergents or cleaners should be avoided.
5. Keep furniture away from direct heat or sunlight as much as possible, as the heat and sunlight can damage your furniture.
6. Spills should be mopped up immediately to prevent liquid stains.
7. The use of coasters is recommended for hot items placed on furniture.

## GUIDE TO BUYING BEDROOM FURNITURE

Your bedroom can be as individual as you are. With our expertise to guide you, we'll ensure to help you to create a beautiful bedroom that will give years of pleasure. We do this by keeping abreast of the latest trends and styles, ensuring we have the very best selection of quality bedroom furniture available at value for money prices.

## OUR 5 TOP TIPS YOU SHOULD CONSIDER

1. The style or look you want in your bedroom
2. The furniture choices/options in each range
3. The space you have available
4. Your budget
5. Ongoing maintenance

Furniture for the most part is like fashion in that it follows trends and styles. Some trends are brand new, never seen before whilst others are a 'take' on a previous era. It is important when designing your bedroom that you know the style or look you want to achieve. For some customers, cool, crisp, clean lines is their desired style whilst for others it is pure opulence.

What we're seeing in 2016 is a mixture of styles in bedroom furniture but quality is the key component across all ranges

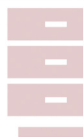

At Meubles we are in the enviable position that we can cater for most styles or looks our customers want to achieve. Our bedroom furniture range includes:

Traditional	furniture that is inspired by a variety of eras often from the 18th and 19th centuries. Elements include rich hues, intricate details and antique handles and knobs.
Country	furniture that often has an antique look and feel. Painted finishes in soft palette colours or rich chunky tops and legs abound.
Rustic	furniture that features a mix of natural materials and finishes often encompassing rustic or distressed finishes with a vintage vibe.
Contemporary	furniture that has clean, crisp lines with uncluttered designs or features. It can include bold colours or a predominantly white based palette.

Why not take a look at our blog for the latest trends or call in-store to speak to one of sales advisors who can guide you through the myriad of choices ensuring what you choose is right for you and your needs.

## 2. THE CHOICE /OPTIONS IN EACH RANGE

To be able to offer our customers a fantastic choice of bedroom furniture at reasonable prices, we constantly meet and visit various furniture manufacturers to examine what they have available. When we select manufacturers to work with we carefully consider the complementary pieces they have in each range so we can provide our customers with a great mix and match range of options. If money is tight now, it may be an idea to purchase the essentials and add to your bedroom furniture at a later date. But please note that we can't always guarantee that we will have each collection available indefinitely.

## SOME KEY ITEMS WE SUGGEST YOU CONSIDER INCLUDE:

### Blanket Box/Ottoman

Perfect for placing at the foot of a bed, they are great as a place to sit as well as store bed linen and extra blankets and pillows. We have a great range to choose from including wooden and fabric versions.

### Headboard

The trend is big and beautiful. We have a great selection of wooden, fabric and upholstered versions that match some of our bedroom furniture collections. Used and positioned in the right way they can dramatically change the overall look and feel of a bedroom.

### CHEST OF DRAWERS

With most manufacturers offering a wide choice of sizes there's one to suit most bedrooms. Apart from a great place to store clothing, underwear etc. the surface area is an ideal spot for toiletries, photos, lamps and even TVs.

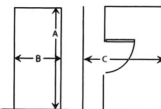

3.

## THE AVAILABLE SPACE

When you purchase your new bedroom furniture you'll want each piece to be in proportion to the size of the room and indeed other items that will also reside there. A great way to ensure that you purchase right first time is to map out where each item will go in the room itself prior to ordering, thus ensuring there is enough space to walk around the bed, open a drawer or even open a door or window.

To do so we recommend that you measure out each item in the room using either newspaper or masking tape to outline each item. Our product specification sheets that you'll find on our website or in our store give the overall dimensions of the majority of furniture we sell. These measurements include height (h), width (w), depth (d) and length (l) when applicable. All our measurements are in centimetres (cms).

Measure A (height of room/space)  
Measure B (width of room/space)  
Measure C (width of access point and room)

We also strongly urge that you exercise caution when ordering bedroom furniture based on current house plans. As is often the case, house plans can be changed during the construction phase often seeing a previously unheard of wall appearing or space narrowing to accommodate specific features.

## MEASURING

4.

## THE BUDGET

When you are considering updating your bedroom furniture or buying bedroom furniture for the first time, it is advisable to have a budget in mind. At Meubles we offer a wide and varied choice of bedroom furniture including fully bespoke fitted bedroom furniture as well as standalone pieces with matching and complementary items.

If your budget is a little on the slim side consider purchasing bedside lockers and a wardrobe along with a matching bedstead or mattress and divan with complementary headboard only. These 3-4 items are the main components required for any bedroom. If and when money allows you can possibly add to your bedroom furniture at a later time.
